Introduction

I am Mohamed Abdelazeem, a senior Computer Science student (4th year) with a strong passion for Front-End Development. I specialize in building modern and **interactive user interfaces using Angular and TypeScript**, along with solid experience in designing and customizing **websites through WordPress**.

Throughout my academic journey and personal projects, I have developed user-friendly web applications that focus on delivering a smooth UI/UX experience. My background combines academic knowledge in computer science fundamentals with hands-on practice, enabling me to turn concepts into practical solutions.

Education

Modern University For Technology Information , BS in Computer Science	Aug 2022 – Aug 2026
• GPA: 2.7/4.0	
• Coursework:	
Iti : Javascript , Html 5 , Css , Php , laravel	
Nti : Javascript , Node js , Express js , Mongo db , Angular , Typescript , Responsive Course , Freelance Skills	
Itida : Freelance Skills	
Route Acadamy: Html 5 , Css 3 , Responsive Design , Bootstrap 5 , Javascript , Typescript , Angualr ts , Restful Api , Sass	

Projects

E-Commerce Website App	Live Demo
Built a fully functional E-Commerce web application using Angular, TypeScript, and Tailwind CSS. Implemented responsive design to ensure seamless user experience across all devices. Integrated authentication system (login & signup) to enhance security and user management. Focused on creating a clean UI, smooth navigation, and optimized performance for better usability.	
Tools Used: Angular, RESTful API, Authentication, TypeScript, Tailwind, Components, Services, JWT, Responsive Design, Owl Carousel, Ngx Pagination.	
• Wethaq Store	Live Demo
Built a full online store for women's apparel using WordPress + WooCommerce, delivering a responsive and mobile-first shopping experience.	
Designed pages with Elementor (Home, Catalog, Product, Cart, Checkout, My Account) and created custom sections for promotions and seasonal collections.	
Enabled multiple payment methods for a flexible, secure checkout (cards, digital wallets/transfers, Cash on Delivery, bank transfer) with order notifications.	
Configured shipping rules (zones/tiers, cost by city/weight) and order tracking, plus clear return & exchange policies.	
Tools Used: Wordpress , Elementor , Contact Form 7 , Payment Getway	
• Weather App	Live Demo
Built a web app that lets users search for a city/location and view real-time temperature, wind speed, and humidity.	
Integrated a Weather API to fetch live data and display it in a clean, readable layout.	
Implemented an intuitive search UI with responsive design for mobile and desktop.	
Added basic error handling (e.g., invalid city names) with clear user feedback.	
Tools Used: Api , Javascript , Css 3 , Html 5 , Responsive Design	
• Crud App	Live Demo
Developed a web application that allows users to Create, Read, Update, and Delete (CRUD) records through a	

simple, user-friendly interface.

Used localStorage to persist data in the browser without a backend, with automatic data loading on page open.

Implemented form validation with clear error messages.

Added instant search and basic sorting/filtering to improve data accessibility.

Built a responsive and clean UI focused on user experience.

Tools Used:LocalStorage , Javascript , Css 3 , Html 5 , Responsive Design , Bootstrap 5

Technologies

- **Technologies:** Angular, Wordpress , Javascript , Typescript, Jquery , Css 3 , Responsive Design , Html 5 , Bootstrap 5 , Tailwind , Sass , Node js , Auth , Express js , mongo db , mongoose

Version Control: Git ,Github

Tools: Figma , Visual Studio Code , Postman , Terminal , vercel , netlify , npm , Trello

Languages:

Arabic : Fluent

Engilsh : Good
